

Due to my travels, business and personal, I benefit greatly through the XM's coverage of both weather and traffic reports. These services may be available through commercial radio but seldom at the time I need the information. In addition, Let the marketplace work! The greatest impediment to free enterprise and the spirit of competition is government interference. I respectfully request that the FCC and our elected officials pay more attention to their constituents, those whom they represent, than to lobbyists and special interests. I respectfully request the FCC to reject the NAB's petition 04-160.
